

Mr Cooper & Co
New York
My Dear Sir.

St Petersburg 4 August 1827.

The 6 Copies of the Journal, for our collection, arrived safely, & reached St. Petersburg. One Copy I deemed proper to present to Professor F. Fischer of Moscow in the name of the Lyceum. He said in a short visit & spoke of yourself & spoke with feelings of great consideration, & gave me a copy of his Catalogue which you wished me to procure. I think the Lyceum will do well to select him as Member. I proposed Jan & Hilary, for the Society of Naturalists at Moscow.

The Academy of Science here is not very prompt in acknowledging favors, nor bestowing them. I shall try a third time to get an entire set of their Memoirs if possible, & as usual I will send myself to your kind Remembrance.

Truly & respectfully, yours

My best Compliments
to Dr. Jay.

I have just received a Note from Mrs. Fries - The Secretary of the Academy of Science here, who regrets not being able to furnish the Lyceum with the numbers of the 1st Series of their Transactions. He sent me the same with 2 Numbers lately published, by your sealed parcels, which I will trouble the Lyceum with - to my regret.

The Academy requests a second Copy of our Annals. I can hardly make up my mind to let them have it - I shall answer & send.
